

The Dodd-Frank Value Test: Did the Post-2010 Reporting Expansion Improve Bank Failure Prediction From Public Data?

*Pre-Dodd-Frank = 41 ratios derivable from pre-2010 Call Report schedules.
Modern = 48 ratios including 7 fields added by Dodd-Frank (deposit/insurance) and Basel III (risk-weighted capital).
Both feature sets trained on 2008-2017, evaluated on 2018-2025. Error bars: 95% bootstrap CI on AUC.*
